

Theme - Workbook 1

Identify themes and connect them to character choices, change, and evidence.

How to use this workbook

Each passage is literary. Choose the theme that is developed through more than one event or detail. A theme must be a complete idea, not just a topic word.

Before you start

- Track change. Compare what the character believes or does at the beginning and end.
- Find the turning point. A choice, consequence, or realization often reveals what idea the story develops.
- Demand evidence. Before choosing a theme, identify at least two details that support it.

When two volunteers pointed out that several older gardeners used informal shortcuts between beds, Eli said those paths were not part of the plan. Answer key and reasoning

1. **A.** A is developed through Hana's choice, the group interaction, and her changed behavior on Monday. D is plot summary; B is too absolute; C is only a topic-level observation.
2. **C.** C shows that Hana's one-time choice became a lasting change in how she approached inclusion.
3. **A.** A is supported by Owen's shift from wanting to hide the crack to displaying the repaired bowl. C is too absolute; D is summary.
4. **B.** The change in how Owen views the crack directly develops the theme about imperfection and value.
5. **A.** A matches Maya's shift from memorizing perfectly to speaking naturally. D is only the plot event that triggers the change.
6. **B.** B shows the result of Maya's increased confidence and new approach.
7. **A.** A is developed through Eli's initial insistence, his observation, and his revision of the map.
8. **C.** C shows that Eli acts on what he learned rather than simply hearing the criticism.

Mistake check

- Picked a one-word topic? Turn it into a complete statement about what the story suggests.
- Picked the plot? Ask what the events show, not merely what happened.
- Picked a "life lesson" that sounds nice? Make sure at least two concrete details from the passage

support it.
