

# Analyze, Don't Just Summarize

Workbook 1 - Learn

## Directions

Build the skill in small pieces. Keep every answer source-based.

### Exercise 1

"Source A reports a 5-degree difference."

**Task:** Turn summary into analysis.

### Exercise 2

A source moves from one example to a citywide recommendation.

**Task:** Name the reasoning weakness.

### Exercise 3

A source admits another factor may affect results.

**Task:** How can you analyze this?

### Exercise 4

A weaker source raises a valid concern.

**Task:** How should you treat it?

# Answer reasoning

Compare your reasoning, not just your wording.

## Exercise 1

**Reasoning target:** The measured difference directly supports the claim that the treatment affected temperature in the studied locations.

## Exercise 2

**Reasoning target:** Overgeneralization or insufficient evidence scope.

## Exercise 3

**Reasoning target:** The limitation makes the reasoning more cautious and prevents a false single-cause claim.

## Exercise 4

**Reasoning target:** Acknowledge it, then explain why the source does not support it enough to outweigh stronger evidence.

## Mistake check

If you missed an item, label the cause: task misunderstanding, source drift, weak evidence match, summary without analysis, organization, or sentence clarity. Then redo the item in one precise sentence.
