

Thesis & Evidence

Workbook 2 - Apply

Directions

Apply the skill with less support. Explain the reasoning, not only the final answer.

Exercise 1

Write a thesis for a source with strong data but a limited sample.

Task: Keep the judgment and limitation together.

Exercise 2

A paragraph argues that Source B lacks cost support.

Task: Choose the best evidence type.

Exercise 3

A source includes a strong statistic that does not relate to your paragraph reason.

Task: Use it or cut it?

Exercise 4

A source says a policy may reduce delays.

Task: Paraphrase without source drift.

Answer reasoning

Compare your reasoning, not just your wording.

Exercise 1

Reasoning target: Example: Source A is better supported because it reports measured results and limits its recommendation to a cautious expansion.

Exercise 2

Reasoning target: A missing budget comparison or absent cost estimate from Source B.

Exercise 3

Reasoning target: Cut or move it. Relevance is more important than impressive numbers.

Exercise 4

Reasoning target: The source suggests the policy may reduce delays; do not change may to will or proves.

Mistake check

If you missed an item, label the cause: task misunderstanding, source drift, weak evidence match, summary without analysis, organization, or sentence clarity. Then redo the item in one precise sentence.
