

Relationships - Workbook 2

Analyze how context, repeated details, and choices shape meaning.

Strategy reminder

Write A → B using a precise verb: causes, changes, motivates, limits, reveals, contrasts, or strengthens. Then find the evidence showing the effect.

Pilot Garden

Text 1

A housing complex started a small garden in one courtyard rather than planting every courtyard at once. Residents used the pilot garden for a month and reported that the herb beds were popular but the watering schedule was confusing. Managers added larger labels and a shared watering calendar before expanding the design to two more courtyards.

1. How does the pilot garden affect the later expansion?

- A. It provides feedback that leads managers to revise labels and watering procedures before expanding
- B. It prevents any expansion
- C. It proves residents dislike herbs
- D. It has no relationship to the later design

2. What role do the residents' comments play?

- A. They identify strengths and problems that shape the revised design
- B. They cause the courtyard to disappear
- C. They are unrelated decoration
- D. They replace the garden with parking

Night Market

Text 2

A neighborhood night market grew from twelve vendors to nearly forty. The larger crowd brought more customers, but it also blocked the narrow sidewalk near the entrance. Organizers moved food stalls deeper into the plaza and created a separate entry lane. Sales remained high while the entrance became easier to move through.

3. How does the market's growth affect the organizers' plan?

- A. The larger crowd creates a movement problem that leads to a new stall layout and entry lane
- B. Growth causes organizers to close the market
- C. Growth has no effect on layout
- D. The sidewalk becomes wider by itself

4. How does the final result relate to the redesign?

- A. It shows the redesign reduced congestion without eliminating the market's strong sales
- B. It shows sales stopped
- C. It proves the crowd disappeared
- D. It reverses the reason for redesign

Open Window

Text 3

During a school festival rehearsal, siblings Mina and Jo argued because Jo kept leaving the practice room to check the outdoor stage. When a sudden downpour began, water blew through an open window and soaked several paper decorations. Jo returned immediately, helped Mina move the remaining decorations, and suggested storing the replacements in plastic bins near the door. The next day, Mina asked Jo to check the weather before rehearsal.

5. How does the downpour affect the siblings' conflict?

- A. It creates a shared problem that shifts them from arguing to cooperating
- B. It makes them stop speaking forever

- C. It proves Jo caused the weather
- D. It has no effect on their behavior

6. How does Jo's response affect Mina's later behavior?

- A. His useful response leads Mina to trust him with checking the weather
- B. It causes Mina to ban him from rehearsal
- C. It makes Mina ignore the weather
- D. It has no connection to the next day

Review your reasoning

Before checking the key, mark the question that felt hardest. Write one clue that changed your mind and name the distractor that was most tempting.

Answer key and reasoning

1. A - The pilot generates information that changes the design before scale-up.

Watch for: A trial often functions as evidence for revision.

2. A - The feedback is the link between the pilot experience and later changes.

Watch for: Ask what the detail contributes to the development of the idea.

3. A - Growth produces congestion, which motivates the layout changes.

Watch for: Track problem -> response -> result.

4. A - The result shows the redesign addresses the side effect while preserving the benefit.

Watch for: A later result can evaluate an earlier decision.

5. A - The weather event changes their interaction from conflict to joint action.

Watch for: In literary relationships, an event can alter how characters respond to each other.

6. A - Mina's request reflects greater trust in Jo's attention to the outdoor conditions.

Watch for: Look for how one character's action changes another character's later choice.
