

Sequence - Workbook 2

Practice implied order and steps that depend on earlier conditions.

Strategy reminder

Find the target step, then build a small BEFORE -> TARGET -> AFTER chain. A true detail is not enough; it must be in the position the question asks for.

Seed Exchange

Text 1

Gardeners place unopened seed packets on the check-in table. A volunteer sorts the packets by plant type and removes any that are expired. The remaining packets are counted, and the final count is entered into a shared spreadsheet. Only after the count is saved are gardeners invited to choose replacement packets.

1. Which event must occur before gardeners are invited to choose packets?

- A. The final count is saved
- B. All packets are planted
- C. Gardeners choose packets first
- D. The spreadsheet is deleted

2. Which event occurs immediately before the final count is entered into the spreadsheet?

- A. Gardeners choose replacement packets
- B. The remaining packets are counted
- C. Packets are planted
- D. The spreadsheet is saved after selection

Equipment Checkout

Text 2

A student selects a camera in the equipment portal and requests a pickup time. The media lab reviews the request. If the student has no overdue equipment, the request is approved and a pickup locker is assigned. The locker code is sent one hour before pickup. After the camera is returned, the locker code expires automatically.

3. Which event happens immediately after the request is approved?

- A. A pickup locker is assigned
- B. The code expires
- C. The camera is returned
- D. The student receives the code before approval

4. Which event occurs last?

- A. The request is reviewed
- B. A locker is assigned
- C. The camera is returned
- D. The request is approved

Mara's Errand

Text 3

Mara left the print shop with a poster tube and realized she had forgotten the event tape. She crossed the street to the hardware store, bought two rolls, and placed the receipt inside the tube so she would not lose it. Before returning to campus, she stopped at a cafe to call the event coordinator. Only after confirming the room number did she board the bus.

5. What did Mara do immediately before boarding the bus?

- A. She bought tape
- B. She called the print shop
- C. She confirmed the room number
- D. She placed the receipt in the tube

6. Which event occurred before Mara called the event coordinator?

- A. She bought tape
- B. She boarded the bus
- C. She confirmed the room number after the call
- D. She arrived on campus

Review your reasoning

Before checking the key, mark the question that felt hardest. Write one clue that changed your mind and name the distractor that was most tempting.

Answer key and reasoning

1. A - The phrase "only after" makes the saved count the required earlier event.

Watch for: Look for the condition, not just the first event in the paragraph.

2. B - Counting the remaining packets directly precedes entering the count.

Watch for: Do not confuse entering with saving; saving comes later.

3. A - Locker assignment follows approval.

Watch for: The code is sent later, so it is not the immediate next event.

4. C - Returning the camera comes after approval, locker assignment, and pickup.

Watch for: The code expiry happens after return, but the option asks among listed events; choose the latest listed event.

5. C - The final sentence says she boarded only after confirming the room number.

Watch for: A prior action can be important without being the immediate previous one.

6. A - Buying the tape occurs before the cafe phone call.

Watch for: Choose an event that is clearly earlier, not a later result.
