

Point of view / perspective - Workbook 1

Focused practice - Workbook 1 of 3

How to use this workbook

Read each text closely. Decide what relationship the question is testing before looking at the options. After checking the key, explain why the strongest wrong answer fails.

Before you start

- Use the surrounding text, not one isolated keyword.
- Prefer precise relationship words such as illustrates, qualifies, contrasts, supports, or results in.
- Do not accept an answer that merely summarizes when the question asks about function or effect.

Bus Lane Debate

A shop owner says a proposed bus lane could remove short-term parking near her store. A commuter says the lane could make buses faster and safer. The report presents both quotations before giving traffic counts.

1. Which statement best describes the perspective or perspectives in this text?

- A. The shop owner emphasizes parking access, while the commuter emphasizes transit speed and safety.
- B. Every person in the text emphasizes exactly the same concern.
- C. The author or narrator has complete access to every person's private thoughts.
- D. The text gives an opinion unrelated to the issue being discussed.

2. What is the effect of presenting the text from this perspective or set of perspectives?

- A. It removes all uncertainty and disagreement from the text.
- B. The report separates the speakers' concerns from its later neutral data instead of treating either quote as the author's view.
- C. It proves one viewpoint is correct without evidence.
- D. It prevents readers from understanding any difference in priorities.

First Day

I kept checking the room number even after I found the correct door. Everyone else seemed to know where to sit. When Leo waved from the back row, I finally stopped gripping my schedule.

3. Which statement best describes the perspective or perspectives in this text?

- A. Every person in the text emphasizes exactly the same concern.
- B. The author or narrator has complete access to every person's private thoughts.
- C. The first-person narrator experiences uncertainty and relief directly.
- D. The text gives an opinion unrelated to the issue being discussed.

4. What is the effect of presenting the text from this perspective or set of perspectives?

- A. It removes all uncertainty and disagreement from the text.
- B. It proves one viewpoint is correct without evidence.
- C. It prevents readers from understanding any difference in priorities.
- D. Readers know the narrator's thoughts and physical reactions but not what the other students are thinking.

Park Lighting

Some residents praise brighter path lighting because they feel safer after sunset. Birdwatchers worry that excessive light can disturb nocturnal species. The article explains that planners are testing shielded fixtures.

5. Which statement best describes the perspective or perspectives in this text?

- A. Residents and birdwatchers value different outcomes: nighttime visibility versus limiting ecological disturbance.
- B. Every person in the text emphasizes exactly the same concern.
- C. The author or narrator has complete access to every person's private thoughts.
- D. The text gives an opinion unrelated to the issue being discussed.

6. What is the effect of presenting the text from this perspective or set of perspectives?

- A. It removes all uncertainty and disagreement from the text.
- B. Including both perspectives explains why planners are testing a compromise rather than simply adding brighter lights everywhere.
- C. It proves one viewpoint is correct without evidence.
- D. It prevents readers from understanding any difference in priorities.

Answer key and reasoning

1. A. The shop owner emphasizes parking access, while the commuter emphasizes transit speed and safety.
2. B. The report separates the speakers' concerns from its later neutral data instead of treating either quote as the author's view.
3. C. The first-person narrator experiences uncertainty and relief directly.
4. D. Readers know the narrator's thoughts and physical reactions but not what the other students are thinking.
5. A. Residents and birdwatchers value different outcomes: nighttime visibility versus limiting ecological disturbance.
6. B. Including both perspectives explains why planners are testing a compromise rather than simply adding brighter lights everywhere.

Mistake review

- If you summarized instead of explaining a relationship, label it summary-not-function.
- If you chose a transition or structure because of one keyword, label it one-clue trap.
- If you confused a quoted perspective with the author's own view, label it viewpoint source.
- If you named a rhetorical device but missed what it achieves, label it effect missed.
- Redo missed questions later without looking at the key.
