

Text structure - Workbook 1

Focused practice - Workbook 1 of 3

How to use this workbook

Read each text closely. Decide what relationship the question is testing before looking at the options. After checking the key, explain why the strongest wrong answer fails.

Before you start

- Use the surrounding text, not one isolated keyword.
- Prefer precise relationship words such as illustrates, qualifies, contrasts, supports, or results in.
- Do not accept an answer that merely summarizes when the question asks about function or effect.

School Courtyard

The courtyard had almost no shade, so students avoided it at midday. The school planted six trees, added two fabric canopies, and moved several benches. By the end of the term, lunchtime use had increased.

1. Which text structure best describes this passage?

- A. problem / solution
- B. compare / contrast
- C. sequence / process
- D. classification / description

2. How does that structure help develop the passage?

- A. It hides the relationship among the main ideas.
- B. The organization makes it easy to see the original difficulty, the responses, and the resulting change.
- C. It arranges details without helping readers understand how they connect.
- D. It mainly creates suspense rather than explaining the topic.

Coral Nursery

When young coral fragments are placed in protected underwater nurseries, they can grow before being moved to damaged reefs. Warmer water, however, can slow growth or cause bleaching. Researchers therefore monitor temperature as well as growth.

3. Which text structure best describes this passage?

- A. compare / contrast
- B. sequence / process
- C. cause / effect
- D. classification / description

4. How does that structure help develop the passage?

- A. It hides the relationship among the main ideas.
- B. It arranges details without helping readers understand how they connect.
- C. It mainly creates suspense rather than explaining the topic.
- D. The structure links environmental conditions with coral growth and explains why temperature monitoring matters.

Two Study Rooms

Room A has movable tables, bright lighting, and a whiteboard. Room B has fixed desks, softer lighting, and sound-absorbing panels. Students may prefer Room A for group planning and Room B for quiet individual work.

5. Which text structure best describes this passage?

- A. compare / contrast
- B. cause / effect
- C. sequence / process
- D. classification only

6. How does that structure help develop the passage?

- A. It hides the relationship among the main ideas.
- B. Presenting the rooms by matching features helps readers compare which setting fits different study needs.
- C. It arranges details without helping readers understand how they connect.
- D. It mainly creates suspense rather than explaining the topic.

Answer key and reasoning

1. A. The ideas are organized as problem / solution.
2. B. The organization makes it easy to see the original difficulty, the responses, and the resulting change.
3. C. The ideas are organized as cause / effect.
4. D. The structure links environmental conditions with coral growth and explains why temperature monitoring matters.
5. A. The ideas are organized as compare / contrast.
6. B. Presenting the rooms by matching features helps readers compare which setting fits different study needs.

Mistake review

- If you summarized instead of explaining a relationship, label it summary-not-function.
- If you chose a transition or structure because of one keyword, label it one-clue trap.
- If you confused a quoted perspective with the author's own view, label it viewpoint source.
- If you named a rhetorical device but missed what it achieves, label it effect missed.
- Redo missed questions later without looking at the key.
