

Choose the Stronger Argument

Workbook 2 - Apply

Directions

Apply the skill with less support. Explain the reasoning, not only the final answer.

Exercise 1

Source A uses a 1,000-person survey about preference. Source B uses a 100-person trial measuring the actual outcome.

Task: Which evidence may be more relevant?

Exercise 2

A source raises a valid concern and proposes further study.

Task: How can it still be weaker?

Exercise 3

A source uses one city as evidence for a national conclusion.

Task: What should you test?

Exercise 4

A source reports mixed results and recommends a small pilot.

Task: Why may this be strong reasoning?

Answer reasoning

Compare your reasoning, not just your wording.

Exercise 1

Reasoning target: Source B may be more relevant if the question is about the measured outcome, despite the smaller sample.

Exercise 2

Reasoning target: If it lacks evidence showing the concern is large enough to outweigh the other source's measured support.

Exercise 3

Reasoning target: Whether the conclusion is broader than the evidence supports.

Exercise 4

Reasoning target: The recommendation matches uncertainty instead of overstating the evidence.

Mistake check

If you missed an item, label the cause: task misunderstanding, source drift, weak evidence match, summary without analysis, organization, or sentence clarity. Then redo the item in one precise sentence.
