

Understand & Map the Sources

Workbook 2 - Apply

Directions

Apply the skill with less support. Explain the reasoning, not only the final answer.

Exercise 1

Source A has measured outcomes but a small sample. Source B has a broad survey but no before-and-after data.

Task: Make a four-part map for each source.

Exercise 2

A writer says, "The program could reduce costs" after one short example.

Task: What should your map flag?

Exercise 3

Both sources use statistics, but one statistic measures the claimed outcome while the other measures preference.

Task: What should your map note?

Exercise 4

A source admits another factor may have affected the result.

Task: How should that appear in your map?

Answer reasoning

Compare your reasoning, not just your wording.

Exercise 1

Reasoning target: Separate claim, evidence, reasoning, and limitation; do not decide the winner until both maps are complete.

Exercise 2

Reasoning target: A qualified prediction plus limited evidence scope.

Exercise 3

Reasoning target: The evidence types are different; do not treat all numbers as equally relevant.

Exercise 4

Reasoning target: As a limitation or alternative explanation, not automatically as proof the source is weak.

Mistake check

If you missed an item, label the cause: task misunderstanding, source drift, weak evidence match, summary without analysis, organization, or sentence clarity. Then redo the item in one precise sentence.
