

Point of view / perspective - Workbook 2

Focused practice - Workbook 2 of 3

How to use this workbook

Read each text closely. Decide what relationship the question is testing before looking at the options. After checking the key, explain why the strongest wrong answer fails.

Before you start

- Use the surrounding text, not one isolated keyword.
- Prefer precise relationship words such as illustrates, qualifies, contrasts, supports, or results in.
- Do not accept an answer that merely summarizes when the question asks about function or effect.

Remote Work

A manager describes remote work as useful for focused tasks but harder for spontaneous mentoring. An employee says working from home saves commuting time and makes deep work easier.

1. Which statement best describes the perspective or perspectives in this text?

- A. Both see benefits, but the manager emphasizes team interaction while the employee emphasizes time and concentration.
- B. Every person in the text emphasizes exactly the same concern.
- C. The author or narrator has complete access to every person's private thoughts.
- D. The text gives an opinion unrelated to the issue being discussed.

2. What is the effect of presenting the text from this perspective or set of perspectives?

- A. It removes all uncertainty and disagreement from the text.
- B. The contrast shows that the same arrangement can be judged differently depending on role and priorities.
- C. It proves one viewpoint is correct without evidence.
- D. It prevents readers from understanding any difference in priorities.

From my apartment window, I saw branches bend and rain sweep across the street. I texted my brother across town, but until he replied I had no idea whether his neighborhood had lost power.

Mistake review

- If you summarized instead of explaining a relationship, label it summary-not-function.
- If you chose a transition or structure because of one keyword, label it one-clue trap.
- If you confused a quoted perspective with the author's own view, label it viewpoint source.
- If you named a rhetorical device but missed what it achieves, label it effect missed.
- Redo missed questions later without looking at the key.
