

Transitions & signal words - Workbook 3

Focused practice - Workbook 3 of 3

How to use this workbook

Read each text closely. Decide what relationship the question is testing before looking at the options. After checking the key, explain why the strongest wrong answer fails.

Before you start

- Use the surrounding text, not one isolated keyword.
- Prefer precise relationship words such as illustrates, qualifies, contrasts, supports, or results in.
- Do not accept an answer that merely summarizes when the question asks about function or effect.

Remote Training

Employees can complete the safety module from home. they must still demonstrate the equipment procedure in person.

1. Which transition best connects these ideas? "Employees can complete the safety module from home. ____, they must still demonstrate the equipment procedure in person."

- A. Even so
- B. However
- C. As a result
- D. For example

2. What relationship should the transition signal?

- A. simple addition with no contrast or cause
- B. contrast / qualification
- C. an example of the first idea
- D. a chronological step with no logical relationship

Tree Survey

Researchers recorded trunk diameter and canopy width for each tree. they photographed leaf damage and noted nearby pavement.

3. Which transition best connects these ideas? "Researchers recorded trunk diameter and canopy width for each tree. _____, they photographed leaf damage and noted nearby pavement."

- A. However
- B. As a result
- C. In addition
- D. For example

4. What relationship should the transition signal?

- A. simple addition with no contrast or cause
- B. an example of the first idea
- C. a chronological step with no logical relationship
- D. addition

Train Delay

A signal problem stopped trains for twenty minutes. platforms became crowded and several connecting buses left before passengers arrived.

5. Which transition best connects these ideas? "A signal problem stopped trains for twenty minutes. _____, platforms became crowded and several connecting buses left before passengers arrived."

- A. Consequently
- B. However
- C. As a result
- D. For example

6. What relationship should the transition signal?

- A. simple addition with no contrast or cause
- B. result
- C. an example of the first idea
- D. a chronological step with no logical relationship

Answer key and reasoning

1. A. The second idea adds a requirement that remains despite the remote option.
2. B. The second idea adds a requirement that remains despite the remote option.
3. C. The second sentence adds more kinds of observations to the survey.
4. D. The second sentence adds more kinds of observations to the survey.
5. A. Crowding and missed connections are presented as effects of the delay.
6. B. Crowding and missed connections are presented as effects of the delay.

Mistake review

- If you summarized instead of explaining a relationship, label it summary-not-function.
- If you chose a transition or structure because of one keyword, label it one-clue trap.
- If you confused a quoted perspective with the author's own view, label it viewpoint source.
- If you named a rhetorical device but missed what it achieves, label it effect missed.
- Redo missed questions later without looking at the key.
